ABOUT AWAAZ.AI

Awaazai is a voice-first AI innovation studio transforming how people interact with digital platforms through intelligent, human-like conversations. The company pioneers voice-based assistants across industries such as leading banks, fintechs, and SMEs.

Salford & Co.

PROJECT SCOPE

This project explores AI capabilities to deliver engaging property tours by leveraging contextual information, conversational AI, and real-time speech interaction, aiming to create a seamless and informative homebuying experience.

OBJECTIVES

1. To develop a voice-enabled assistant that guides prospective homebuyers through immersive, informative property tours.

2. To enhance the homebuying experience by providing instant, personalized answers to buyer questions during the tour.

5 DIFFERENT PHASES

Work steps/ Analysis

Research

Research on different areas where we can enable voice capabilities

Planning

Defining project scope.
Decision on product capabilities and features

Technical Exploration

Frontier models : Open AI , to generate contextual information
Voice models: Whisper, ElevanLabs for STT and TTS

Design and Developement

Built the core system: house tour generation, LangChain-based retrieval, and real-time voice interaction using GPT-4o and ElevenLabs.

Latency Improvement , Integration and Deliver

Realtime conversation with low latency

KEY DELIVERABLES

01

Audio Tour Assistant

Automatically generates and narrates **room-by-room property tours** using listing descriptions and images.

02

Realtime Conversational Assistant

Engages with buyers via voice, answering property-related questions instantly using STT, RAG, and TTS.

03

Frontend Voice Interface

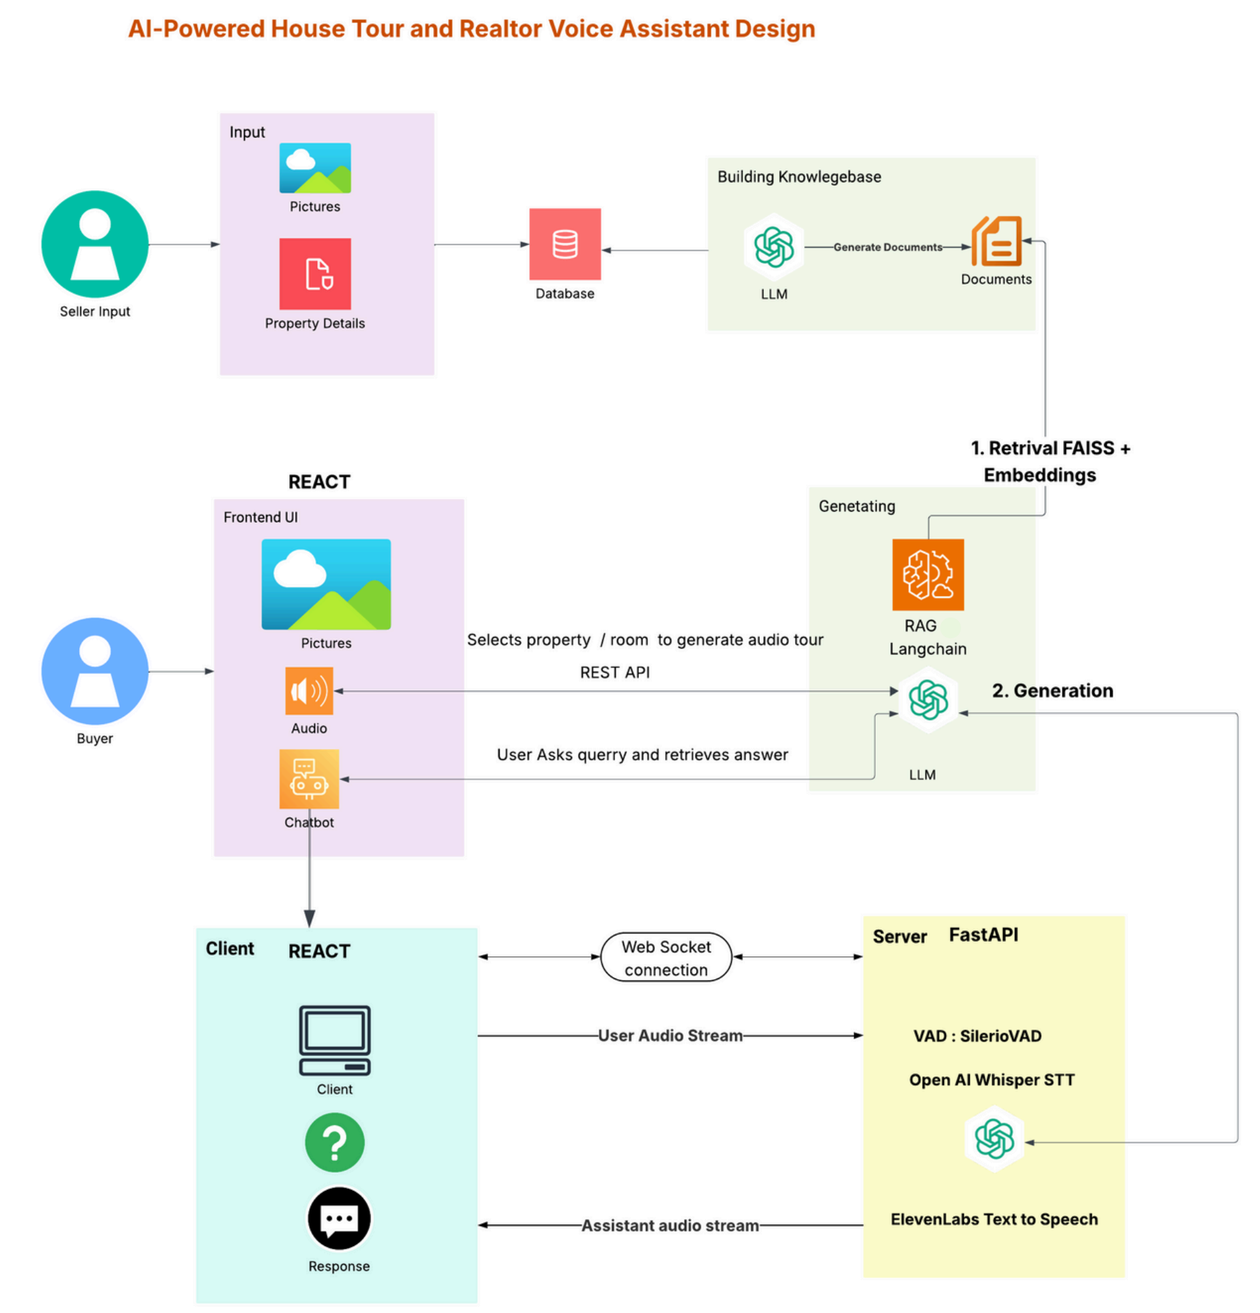

Interactive UI with WebSocket, Voice Activity Detection for natural conversation

04

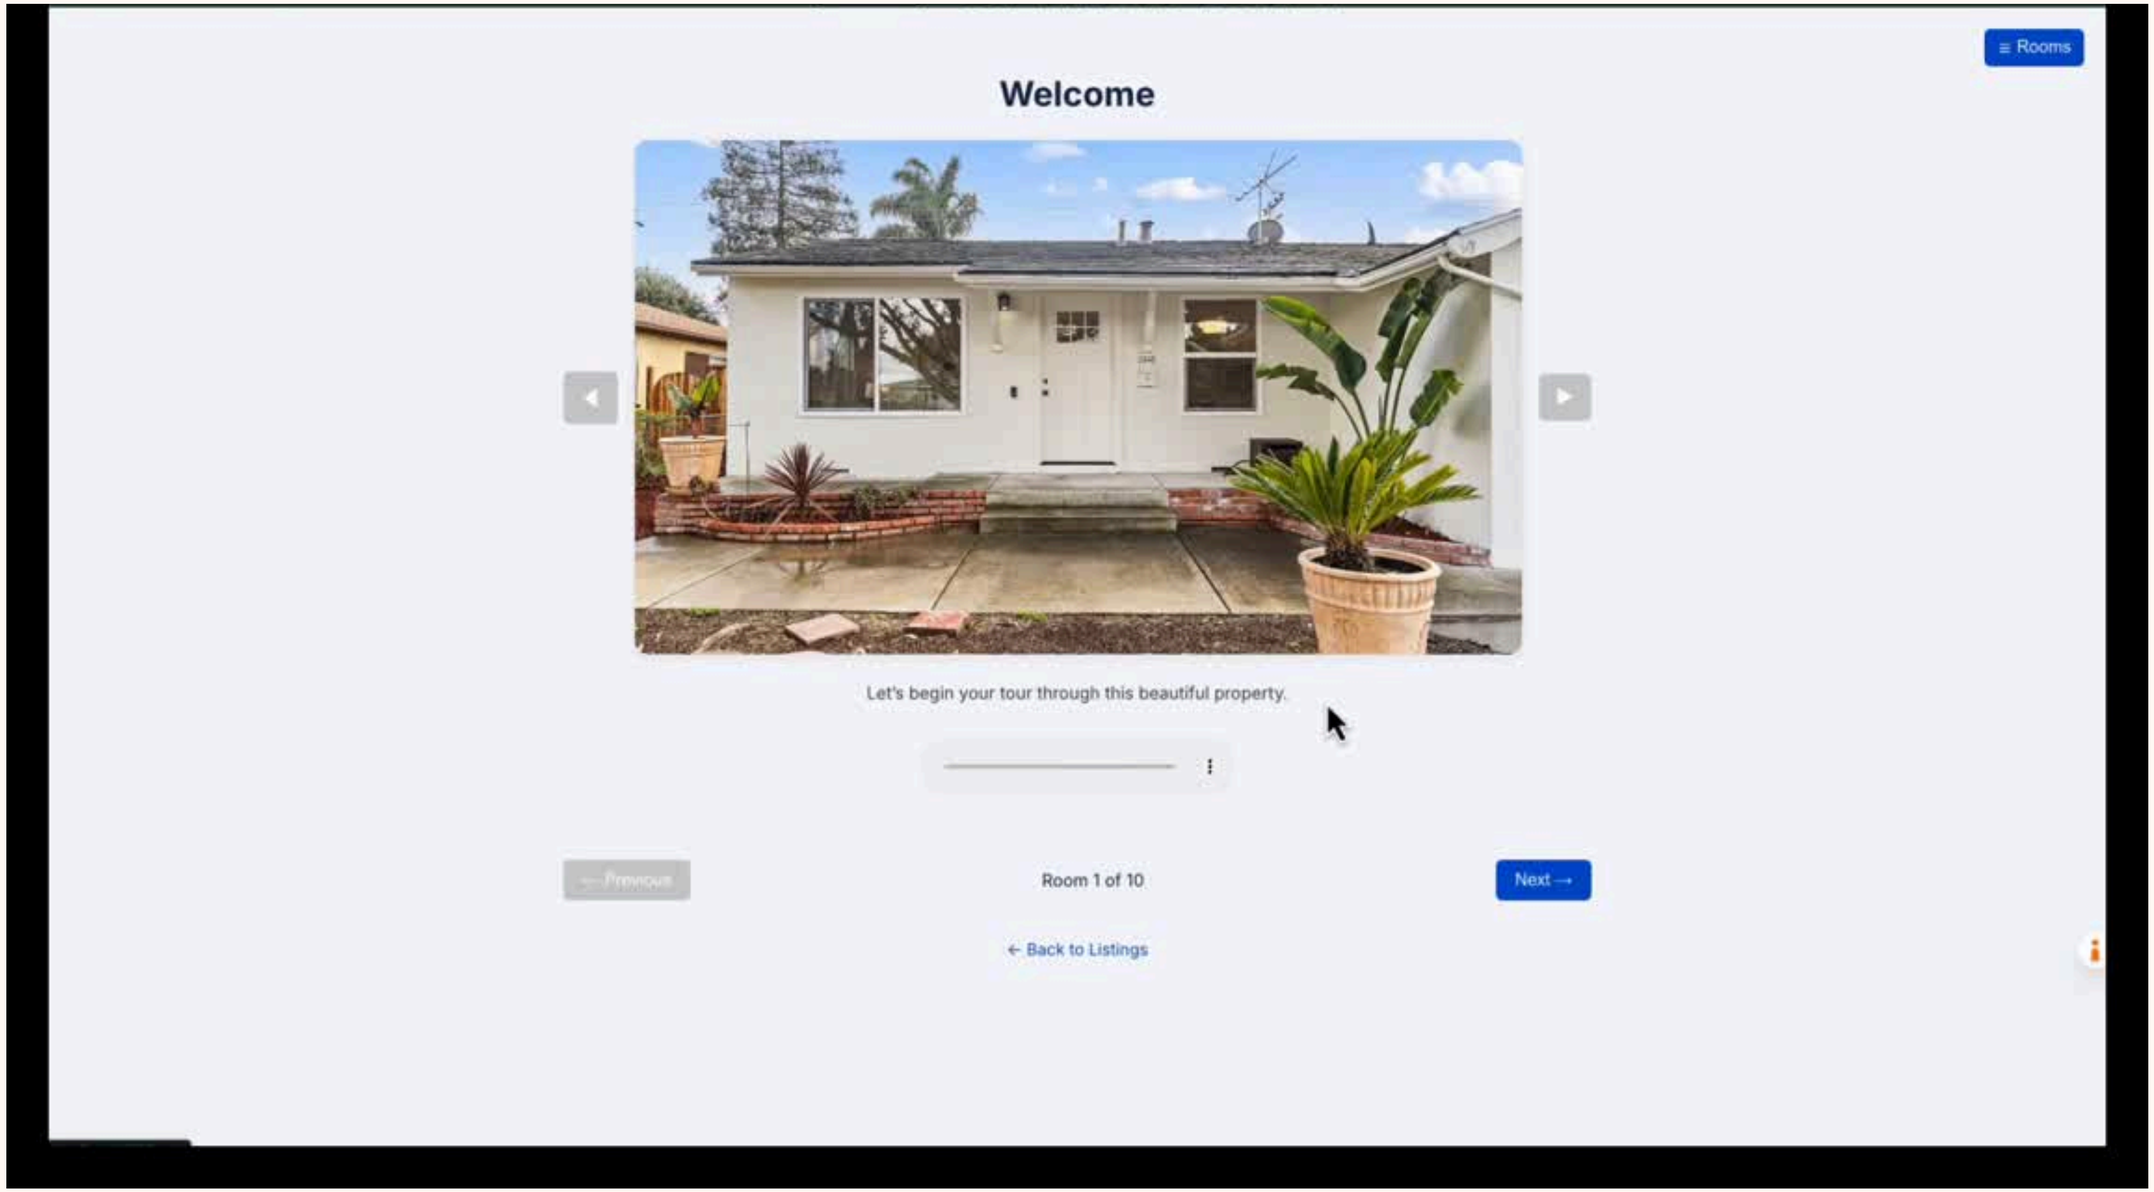

Integrated System MVP

End-to-end system combining data, retrieval, voice AI, and UI into one seamless experience.
